Subject: Re: CFAC Daily Activities - 10/10/2018

Hi Mike,

The following summarizes field oversight activities for 10/10/2018:

- * Flow transects were collected at CFSWP-025, and -044.
- * Sediment, surface water, and porewater samples were collected at CFSWP-014, -025, and -044.
- * Two groundwater sampling crews collected samples at 6 wells (no oversight performed).
- * Rinsate from the porewater probe was sampled.

No issues were noted. Feel free to get a hold of me if you have any questions or would like to discuss.

Thanks very much,
